INSTALLATION

VEHICULAR FLOORS

LAYING SYSTEM

ADHESIVE INSTALLATION

The ideal laying solution for outdoor driveways, car parks, garage ramps, as the laid surface is extremely resistant to both dynamic and concentrated loads.

Expansion joints are required, and the gaps between the tiles must be filled with cement-based grout.

The proposed diagrams and indications are purely indicative of the type of application; please refer to the specific regulations in force in your country in order to lay the floor to the highest technical standards.

For any information and/or suggestion concerning EVO_2/e™ laying system installation, please refer to the specific manual EVO_2/e™.
