LAYING SYSTEM

INSTALLATION ON GRAVEL OR SAND

Laying on gravel ensures correct soil drainage, through the gaps between the slabs, allowing the water to drain off into the ground.

This laying solution is ideal for projects where permanent floor laying is not possible.

The proposed diagrams and indications are purely indicative of the type of application: please refer to the specific regulations in force in your country in order to lay the floor to the highest technical standards.

For any information and/or suggestion concerning EVO_2/e™ laying system installation, please refer to the specific manual EVO_2/e™.
